

“We made the decision to stay in Tumbler Ridge, to build our business primarily because Randy loves the outdoors, and who doesn’t want to wake up in the morning to do the thing that they love best? We get to share all that is unique and wonderful about Tumbler Ridge while enjoying it ourselves. We saw the opportunity to build a family business in a community that is ideal for raising a family in. A small town where you get to know most everyone. A small town that is still growing and has so much potential.”

- ROXANNE GULICK, OWNER OF WILD RIVER ADVENTURE TOURS

LOOK A LITTLE CLOSER, YOU’LL BE SURPRISED!

Tumbler Ridge is an innovative community that continues to redefine what opportunity and quality of life are in Northern BC. We are a dream destination for the outdoor enthusiast with our waterfalls, unique rock formations, alpine meadows and lakes, canyons, mountain summits, caves, cross-country skiing and snowmobiling. We are also home to the Tumbler Ridge Geopark.

- Virtual Workers

Tumbler Ridge offers an abundance of opportunity for entrepreneurs, skilled workers and families. With natural resources, the four seasons, and energetic people, our community is growing as a desirable location for new residents and businesses.

Tumbler Ridge is investing heavily in our future and garnering both Provincial and International recognition for this work. Incorporated in 1981, the town of Tumbler Ridge was carved out of the wilderness to accommodate coal mining activity in the area. Though still a new community of just over 2,500 people, we buck every stereotype of what a coal mining town should look like and be. Designed as a safe, walkable and family-friendly community, Tumbler Ridge offers clean and diverse neighbourhoods with parks, playgrounds, sports fields, modern, well-planned infrastructure and social and cultural amenities one would expect to find only in larger and longer-established communities.

Our tax rates are amongst the lowest in Canada, combined with low-cost housing (average home price of \$146,000). As a well-managed community and one of the most financially stable in the country, Tumbler Ridge is well positioned for growth. With new investments in mining, wind energy, small businesses, and an increase in tourism due to the designation as North America's second UNESCO Global Geopark, Tumbler Ridge has never looked better.

Tumbler Ridge is rapidly becoming a year-round destination and a destination of choice for active and outdoorsy people who are looking for exceptional experiences. Recognizing how we are quickly experiencing a tourism boom, Tumbler Ridge has made a strategic decision to do what we can to help expand the industry sustainably. We are developing tools and resources to support those interested in either working from Tumbler Ridge or that want to start their own tourism business.

Tumbler Ridge is well suited to ambitious, yet lifestyle and family-oriented workers and entrepreneurs that are looking to take advantage of our expanding tourism industry. Once you have experienced all that we have to offer we are confident that you will want to make Tumbler Ridge your new home.

“I moved to Tumbler Ridge for the lifestyle and the stunning wilderness. I opened an office here and have never looked back.”

- SARAH WATERS, EXECUTIVE DIRECTOR, TUMBLER RIDGE GLOBAL GEOPARK
